About Ken

Ken Soeradi Voskuil is a senior software developer with deep experience in full-stack web development. In 2022 he received his MSc diploma in Computer Science, specializing in Machine Learning, from the University of Leiden.

Email: mail@kaesve.nl
Resume: https://hireken.at/

Ken is a Dutch citizen immigrating to the United States shortly, where he intends to seek full-time employment as a machine learning practitioner. He anticipates receiving his green card by the end of 2023, after which he will be available for employment immediate.

Work Experience

SphereMall   Senior Software Developer   *2021 – Present*

- Leading role in front-end development, making technical and architectural decisions. Used Angular and React to build several microfront-ends.

- Developed several microservices using AWS Lambda, TypeScript, Python, PostGres, Neptune, and ElasticSearch.

- Mentored junior developers both in a team setting and 1-1.

Taxonic   Senior Software Developer   *2018 – 2019*

- Consulted for several companies and government agencies, guiding front-end and linked data projects.

- Helped teams to modernize their front-end stacks.

- Started CARML, an open source RML implementation, a RDF-based data transformation language and engine.

OntoPharma   Full Stack Developer   *2017 – 2018*

- Designed and built a tool for extracting medicine specifications for pharmaceutical companies.

- As one of two developers, carried significant responsibility in building and designing the application. Implemented NLP algorithms for Named Entity Recognition.

- Worked with Figma, React, JavaScript, Java 8, GlassFish, PostGres, Docker, GitLab CI.

Edyt   Front End Developer   *2016*

- Developed a case management system for patent offices, using AngularJS and Python.

- Functioned as the bridge between the design team and engineering. Worked closely with the designers on UX and implementing a design framework.

Trifork   Front End Developer   *2014 – 2016*

- Worked on a case management system for ANWB, the Dutch AAA. Worked with AngularJS, Java, Axon and ElasticSearch.

- Worked on UX, communicated directly with end users to understand their needs.

Education

University of Leiden   *2019 – 2022*   MSc in Computer Science
Specialized in Machine Learning and Data Science.

University of Utrecht   *2010 – 2014*   BSc in Computer Science
Specialized in Game Technology.

Skills

Technologies

JavaScript, TypeScript, WebGL, Angular, React, Vue, NodeJS, Docker, PostGres, Python, PyTorch, TensorFlow

Languages

Dutch (Native)
English (Fluent)
